2025 USPKS Daytona Super GP

Supplemental DIS Rules and Schedules

- No personal transportation is allowed in the paddock, including bicycles, scooters, hoverboards, and anything else with wheels. Golf carts are allowed, with a permit from the DIS office (sign in & credentials area), but only if you are 16 or over. Persons with disabilities that require transportation should contact tim@uspks.com to make arrangements.
- There is no staking down of tents in the paddock. Yes, we know that people did it at WKA. There are underground utilities running everywhere in the pits, and they are easily damaged. Staking is prohibited by DIS. There is water available by the restroom building to fill water barrels for weights.
- All persons on the grounds must wear a wristband to show they have completed the DIS waiver, including those with a USPKS hard card. If you aren't wearing a band, DIS will require you to stop at the Gate 40 entrance each time and complete a DIS waiver. If you lose your band, you can get one there by completing the waiver again.
- Pets are not allowed in the paddock area and should be kept in the camping area. Pets are to be leashed at all times and owners need to clean up after them.
- The camping area and general facility access via Gate 40 is open 24hrs with a wristband, however the karting paddock will close at 10pm each night and the gate will be locked.
- There is a tire dumpster on site to dispose of your used tires. Please put them in the dumpster. Empty fuel cans are also being collected for recycling and should be returned to the collection point.
