The parking lot at OKC has been recently renovated and pit spaces are now 10x45'. Due to the anticipated size of this event, and the limited pit area, competitors will be allowed a maximum of 300 square feet of pit space per entry, with a minimum of one (10x45') pit space for individuals.

Number of pit spaces requested \_\_\_\_\_ x \$75/space = \_\_\_\_\_

OKC also has a limited amount of covered pit space, directly adjacent to the grid areas. The spaces are 15' deep and 8' wide, and are covered by a metal canopy. They are located directly in front of customer garages and have power available. (There is no access to the garages, just the space in front of them). These "garage spaces" fit one kart nicely per space. These spaces will rent for \$30.00 per space. There will be storage for trailers on the other side of a fence, and gate access. The parking for the trailer only will be \$1.50/linear foot. If you would like to rent one or more of these covered spaces, enter the quantity here: \_\_\_\_\_. If you have a trailer to store nearby, enter its length here: \_\_\_\_\_.

Do you need a camping or RV Spot in the remote lot?: \$200 for Tuesday before event thru Monday.
